BROWN RUDNICK REPRESENTS ENVIRONMENTAL TECHNOLOGIES FUND IN £10 MILLION FINANCING OF CLEANTECH COMPANY NUJIRA

London, U.K., September 21, 2009 -- Brown Rudnick, an international law firm, today announced that its Cleantech Team represented Environmental Technologies Fund (ETF) in the recent £10 million funding of Nujira in the second tranche of the 2009 Series D round. The company will use this new round of financing to accelerate development of its handset technology and support expansion into a new market as well as for general commercial development of cellular infrastructure and TV broadcast sectors. The round also included Bank Invest, 3i, Amadeus, Mitsubishi UFJ Capital and private investors.

ETF was created to provide entrepreneurs with a top-quality venture capital group in Europe dedicated solely to the cleantech industry. Brown Rudnick has represented ETF in several of its cleantech investments to date. On this current transaction the Brown Rudnick legal team was led by **Roger Gregory**, a London Partner in the Firm's Private Equity Practice and a member of the Firm's international Cleantech Team.

Facilitating access to seed and growth capital, Brown Rudnick represents investors and companies seeking financing. Clients include emerging growth companies, angel investors, strategic corporate investors, domestic and offshore venture capital funds, hedge funds, private equity funds, commodity pools and similar investment vehicles. London team members continue to define industry standards in the venture capital sector in the UK and across Europe. And as long-time supporters of both BVCA and EVCA, the firm has had the opportunity to contribute significantly to the development of this sector.

For the third consecutive year, Brown Rudnick has been short-listed for the prestigious Investor AllStars Service Provider of the Year Award which honors a specialist advisory firm serving the venture capital industry for its innovation, creativity and overall contribution in a venture financed deal. The Firm was the award recipient in 2008. Also, last year, the Firm was named a finalist for a 2008 UK Technology Innovation & Growth Award by Library House in the category of "Technology Law Firm of the Year."

About Nujira

Nujira's mission is to dramatically improve the energy efficiency of cellular network base stations and digital broadcast transmitters by reducing the amount of waste energy dissipated as heat in the RF Power Amplifier circuit. Nujira High Accuracy Tracking (HAT™) Modulator technology dynamically controls the power supply to the circuit in line with the
