Howard L. Siegel, Chair of Brown Rudnick's Climate & Energy Group, to Present at the 2008 Wall Street Green Trading Summit

*Industry leading event covering all aspects of environmental markets and green trading
Conference expected to sell out at 400*

Boston, MA, February 13, 2008 – Brown Rudnick, a premier international law firm, today announces that **Howard L. Siegel, Chair of Brown Rudnick's Climate & Energy Group**, will present at the 2008 Wall Street Green Trading Summit. The 7th annual event will take place April 2-3, 2008 at The Times Center, located adjacent to the New York Times headquarters in New York. Mr. Siegel's presentation will focus on "Monetizing Renewable Energy and Environmental Attributes: A Legal Roadmap."

Brown Rudnick Berlack Israels LLP is an international law firm with a global network of offices in the United States and Europe. The firm's Climate & Energy Group is comprised of an interdisciplinary team of attorneys and professionals who specialize in matters involving renewable energy project development and finance, emissions reduction schemes and alternative energy sources.

The Climate & Energy Group is unique in its approach to the carbon and renewable markets. By combining seasoned professionals across a spectrum of related disciplines -- energy and environmental law, project and structured finance, regulatory compliance, U.S., Kyoto Protocol and EU emissions trading regimes, renewable energy, intellectual property, venture capital, and government law & strategies -- the team is able to provide fully integrated solutions to participants in the growing carbon and renewable marketplace. Working with consultants, project developers, energy finance, trading and investment specialists and equipment suppliers, Brown Rudnick advises on project development and finance, renewable portfolio standards, risk management, and regulatory and financial aspects of emissions trading schemes. In addition, the Group formulates innovative strategies and creates structured products, derivatives and financing programs in the alternative energy and climate change space that are both cutting edge and commercially viable, including Clean Development Mechanism (CDM) and Joint Implementation (JI) projects and the monetization of EU Emissions Allowances.
